Workflow Setup Ideas

The purpose of the document is to provide a basic understanding of the main ONYX Thrive configurations and give ideas on how an ONYX Thrive workflow can be setup in a variety of way with each configuration to suit a production environment

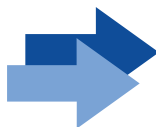

Base Configurations of ONYX Thrive are the 211, 421, 642, 862.

Key Message with any configuration:

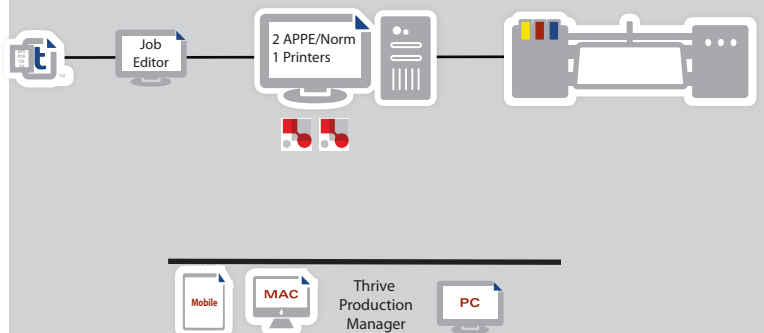

- * You only need to buy ONYX Thrive once
- * It is easy to add to your ONYX Thrive configuration as business grows
(i.e. Grow a 211 into a 642)

Note: These are only ideas, other possibilities exist. For additional information ask you ONYX Reseller or Representative
