

# MeasureColor Reports

Advanced Print Quality Reporting

## Smarter Print Quality Reporting, Simplified

MeasureColor Reports collects, visualizes, and automates MeasureColor Production print quality data from multiple locations, empowering teams with real-time insights for smarter decision-making. Monitor performance, compare suppliers, and uncover process improvements—all from a single, intuitive platform.

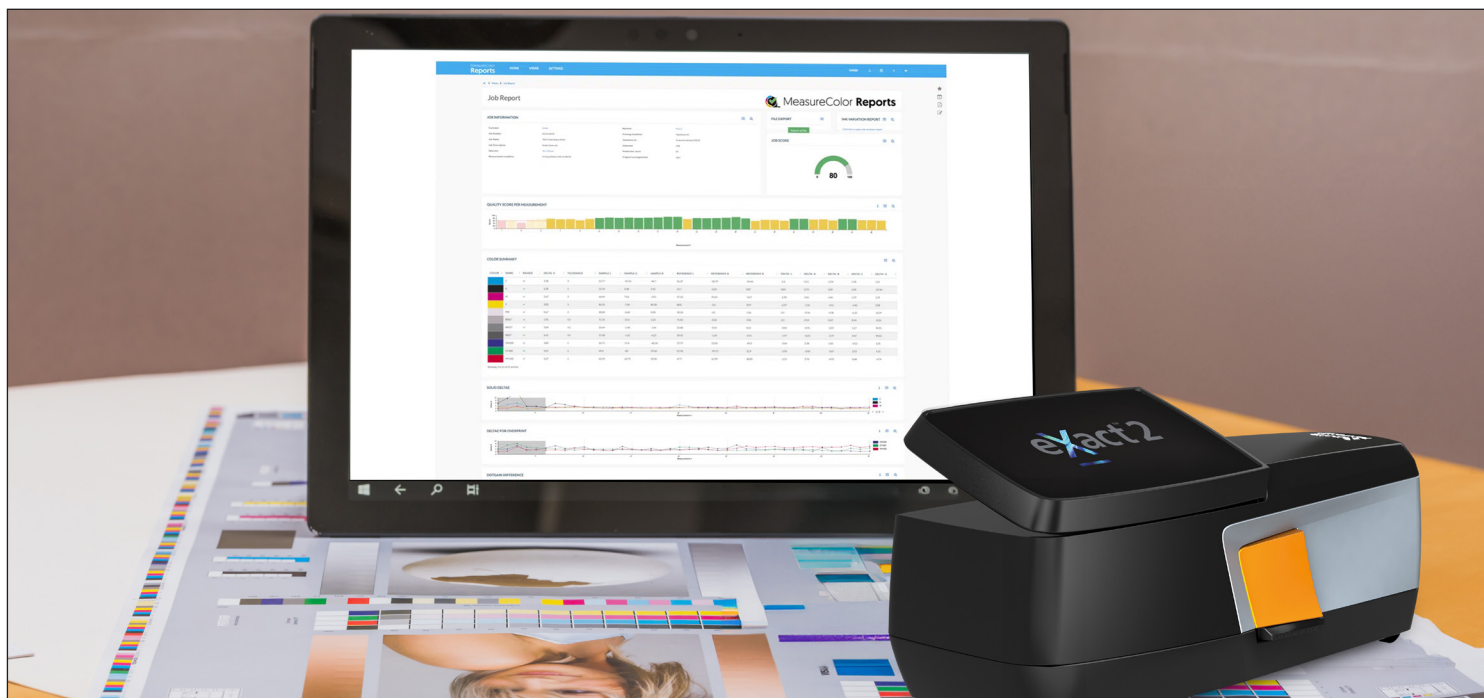

### Key Benefits:

- **Centralized Data** – Track quality across sites, shifts, presses, inks, and substrates
  - **Actionable Insights** – Advanced filtering and analytics for data-driven improvements
  - **Real-Time Monitoring** – Detect issues early and ensure consistent production
  - **Supplier Performance Evaluation** - Compare and optimize supplier quality
  - **Seamless Integration** - Works with third-party systems for a streamlined workflow
- Transform your print quality reporting with automated insights that drive efficiency, consistency, and continuous improvement.

*“MeasureColor has done a phenomenal job in keeping up with technology and industry advances as well as supporting us through our ever-changing customer reporting requirements.”*

- **Chuck Bell, Director of Graphics Optimization**  
MultiColor Corporation
